

Good Messaging Server

Empower your workforce with unprecedented wireless mobility. Good Messaging software utilizes industry standards-based wireless messaging that provides Over the Air (OTA) two-way wireless synchronization with your Total Production Exchange mailbox. Good Messaging wireless messaging and data access offers a true mobile experience including capabilities of Microsoft Outlook and support to view Microsoft Office files (Word, Excel, Power Point), JPEG, GIF, HTM(L), Adobe PDF and PRC files. Tasks such as composing e-mail or editing rich attachments are just clicks away on your handheld device. Good Messaging also allows users to run several applications at once, so you are able to multitask as if you were on your PC.

Highlights:

- Complete real-time wireless synchronization without the use of a cradle
- Industry standards work across platforms and devices
- Good Messaging works on any carrier world-wide
- Wirelessly synchronize your e-mail, calendar, contacts, notes, tasks, public folders and the Global Address List (GAL)
- End-to-End security via Triple-DES and AES Encryption
- Multi-tasking between applications
- Constantly updated so you are always up-to-date with your information
- Please visit www.good.com for an up-to-date list of supported devices.
