

## Microsoft Exchange Server 2003 Hosting Benefits

By using hosted Microsoft Exchange 2003 Hosting service, you and your company will be able to leverage the following features to benefit your organization

### Work from Anywhere, Anytime:

- Work Anytime, Anywhere! Get full access to all of your e-mail folders, contacts, calendars, and files from any Microsoft Outlook or browser, from anywhere, anytime
- Up to date: Any changes made to your e-mails, contacts, calendar and files in any medium, such as MS Outlook or browser access are kept up to date when accessed via any other medium
- Carry your contacts, calendar, notes and task list on the road in your PDA, such as Palm, Handspring, Compaq, Dell, etc.
- Work Offline: Use e-mail, change contacts, schedule meetings and modify files from Public Folders - while disconnected from the Internet, such as while flying, etc. Outlook can keep an offline copy of everything in Outlook; any changes made in offline mode are synchronized.
- Offline Availability: Outlook can create offline versions of all your folders, which are accessible when you're not connected to the Internet. This allows you to make changes while traveling or flying and then synchronize all the changes to the server when you reconnect

### Increase your Productivity:

- Generous Disk Space: Range from 500 MB to 3 GB per mailbox
- Collaborate easily & securely with co-workers, customers and suppliers
- Schedule meetings with your co-workers within seconds by viewing everyone's busy and free times
- Administrative assistants can view, add, change, and delete appointments on other users' calendars
- Eliminate scheduling conflicts for resources such as meeting rooms, equipment, etc.
- Share Files, e-Mail, Contacts and Calendars across the company, department, or project - all through easy-to-use MS Outlook
- Premium SPAM Filters (optional) (client and server-side): Unwanted advertisements cause hours of loss of productivity. The SPAM software will filter out the unwanted messages before they get to your mailbox, saving you time and aggravation
- Save thousands of dollars by not having to purchase licenses for Microsoft Exchange Server 2003, backup software, backup tapes, antivirus software, and an expert to setup and maintain it on an ongoing basis

### Maintain Data Security:

- Enterprise managed firewall - stateful packet inspection & intrusion detection
- Protect against viruses - e-mail is the #1 method that viruses use to spread. We perform automatic virus checking of all inbound and outbound e-mails and their attachments
- Feel safe that your valuable company data is in a secure datacenter, one that is used by the NYSE
- Your data is backed up daily to protect from data loss
