

Premium Server-side SPAM Filter: Postini

Specially designed for the core security requirements and large numbers of users, Postini, in conjunction with Total Production, offers you a comprehensive, yet affordable, set of tools to secure email connections and regulate email delivery. By keeping ever growing volumes of spam and email threats away, you free up your network resources, lower costs, and can be more efficient!

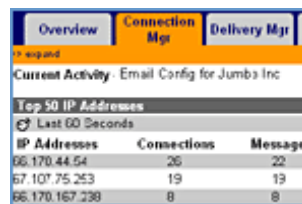

Features of our Premium Anti-Spam Solution, Postini:

- Accurate spam filtering
- Inbound virus blocking
- Directory Harvest Attack and DoS blocking
- User-specific quarantines
- Automated user management
- Optional Disaster Recovery spooling
- Flexible multi-policy architecture
- User-managed white and black lists
- Email and Online support 24x7
- Real-time integration to Directory Sync for streamlining disparate users
